E-book 'Applied physics'

Erasmus+ Project "PHYSICS"

November 30th and December 1st 2017, Riga Technical University

Joan Peuteman

- A final draft version of the e-book on 'applied physics' is available joining the inputs of different authors.
- The course material can be downloaded from the Moodle Platform: http://dl.bsu.by/
- On the Moodle platform:
 - My courses: "applied physics chapters 4-5"
 - This contains the FULL COURSE "APPLIED PHYSICS"
 - 4 documents (the full course + section 4.7 'scanning electron microscopy' separately) (word files + pdf files)

- Let's have a look at:
 - The draft version of the e-book
 - The table of content
- This reveals:
 - We worked a lot.
 - The full text contains 404 pages + the section on "scanning electron microscopy" also named "spectroscopy, microscopy, magnetometry, ellipsometry".

- A limited number of planned sections have not been written. I suggest to omit them.
- We have a full text with a logical order.

- During the current academic year, the final draft version of the book on 'applied physics' is evaluated by the users: students and their professors.
 - When will feedback be available?
- I also suggest the authors have a closer look at the final draft version and give their feedback.

- I suggest the authors have a closer look at the final draft version and give their feedback.
 - Having a check-up for all kind of mistakes.
 - Please verify the names of all authors!
 - When editing, we changed paragraphs and subparagraphs:
 - Some authors used too much paragraphs and subparagraphs.
 - Some authors used almost no paragraphs nor subparagraphs.
 - Do the authors agree with these changes?

Some additional information is needed:

 A short curriculum vitae is missing for a lot of authors/contributors.

When all feedback and information is available, we can work on a final version.

Thank you for your attention!
