Map to access places in Riga

## Routes to access the venue and other places in Riga City

Use the link <https://ej.uz/RTUScientificLibrary>, which is also indicated in programme → select “Directions” from the bar on left side (rounded symbol in white) → choose points/places to be connected with e.g. airport, a hotel, downtown/Old Riga, etc.

Recommended travel modes are connected well with public transport. Otherwise walking tracks are quite suitable and *Taxify* option operates well in Riga City.

Above Google map is designed to show how to get the venue from closest stops of public transport depending on the direction you are approaching from.

From airport “Riga” (RIX) you may travel by bus No 22 or microbus No 322 (previously No 222) which depart from the stop at Riga airport (~100m straight from the exit of airport, passing through parking place) and go to the direction of venue and the centre of Riga City. Please consider that the closest stop to get the venue from the airport by mentioned public transport is before the one designed in above Google map – namely “Daugavgrīvas iela”. Rest of the distance is quite suitable for walking.

Ticket costs of the public transport 1.15 €/trip if bought from a ticket machine at the stop (not all provided, thus better to buy at the stop of airport when choosing the most suitable option/number of trips). Ticket costs 2 €/trip if bought from the driver.
