

TransNEW

Project title: Support for Realising New Member and Associate States' Potentials in Transport Research (Coordination and Support Action, 2009-2011)

Acronym: TransNEW

Project description: TransNEW is a Horizontal Activity for the implementation of the Transport Programme. It is a Coordinating and Support Action aimed at supporting transport research activities in the New Member States. It contributes to the implementation of the Framework Programme and to the preparation of future Community research and technological development. It also stimulates, encourages and facilitates the participation of the New Member States and particularly SMEs in those countries in national, regional and European research. TransNEW has one primary focus to assess, analyse and define strategies for realising New Member and Associated States potentials in transport research. This is absolutely in line with the Integration/Efficiency Topic TPT.2008.8. TransNEW aims to map the transport research capacities in new Member States (and Associated States) by analysing their transport research activities to establish their recent patterns of collaboration. With this information evaluated by Mode and by Activity this will then be used to maximise the benefits of transport research at regional level and at a mode level.
